US 9092428: Claim 1

1. A computer-assisted method for discovering information in a text content and extracting and presenting the information, comprising:

 obtaining, by a computer system, a text content comprising one or more words or phrases or sentences, each being a term or an instance of a term;

selecting a first semantic attribute and a second semantic attribute for users to select from, wherein the first semantic attribute or the second semantic attribute includes an attribute type or attribute value;

wherein the first semantic attribute is associated with a first name or description, and the second semantic attribute is associated with a second name or description;

identifying a words or phrases in the text content associated with the first semantic attribute or the second semantic attribute;

displaying an actionable user interface object, wherein the actionable user interface object is associated with a label representing the first name or description or the second name or description;

allowing the user to select the first name or description or the second name or description as a user-specified or user-desired attribute;

and performing, by the computer system, an action on the word or phrase associated with the user-specified or user-desired semantic attribute, wherein the action includes at least extracting, displaying, storing, showing or hiding, or highlighting or un-highlighting the word or phrase.

US 9092428: Claim 1
Court's Preliminary Construction

NO.	Claim Term	Plaintiff's Proposed Construction	Defendant's Proposed Construction	Court's Preliminary Construction
1	"obtaining, by a computer system, a text content comprising one or more words or phrases [or sentences]" '428 Patent Claims 1 and 14	Plain and ordinary meaning	"Inputting text content into the system prior to tokenization"	Plain and ordinary meaning.
2	"first semantic attribute and second semantic attribute" '428 Patent Claims 1-3, 5, 14-17	Plain and ordinary meaning	"the meaning of a word or phrase, initially based on matching the word or phrase to a pre-compiled dictionary, word list, or dataset, wherein the first semantic attribute is different from the second semantic attribute"	"the meaning of a word or phrase, wherein the first semantic attribute is different from the second semantic attribute"
3	"attribute type or attribute value" '428 Patent Claims 1 and 14	Plain and ordinary meaning	"attribute type" means "a category of meanings of a word or phrase" "attribute value" means "a specific meaning within a category of meanings of a word or phrase"	Plain and ordinary meaning.
4	"identifying a words or phrases in the text content associated with the first semantic attribute or the second semantic attribute" / "identify, in the text content, a word or a phrase associated with the user-specified or user-desired attribute" '428 Patent Claims 1 and 14	Plain and ordinary meaning	"attaching semantic attributes to tokens representing words or phrases in the text content"	Plain and ordinary meaning.

US 9092428: Claim 1
Court's Preliminary Construction

| NO.	Claim Term	Plaintiff's Proposed Construction	Defendant's Proposed Construction	Court's Preliminary Construction
5	"actionable user interface object" '428 Patent Claims 1 and 14	Plain and ordinary meaning	"a user interface object that displays a predefined attribute as a criterion for extracting, displaying or hiding, or highlighting terms that meet the criterion, without user typing in the criterion, or without the need to match a keyword in the criterion with a keyword in the content, as well as its function of receiving user input for a selected action to perform on the terms in the text content that carry the specified attributes"	"a user interface object that enables users to specify which semantic attribute is desired for display or extraction and is associated with a name of said semantic attribute"
6	"user-specified or user-desired attribute" '428 Patent Claims 1 and 14	Plain and ordinary meaning	"semantic attribute that the user selects via the actionable user interface object"	"semantic attribute that the user selects via the actionable user interface object"
7	"threshold value of importance of a word or phrase in representing a topic or information focus" '428 Patent Claims 5 and 17	Plain and ordinary meaning	"a minimum importance score assigned by linguistic processing of a word or phrase"	Plain and ordinary meaning.

US9092428: Claim 1

1. A computer-assisted method for **discovering information** in a text content and extracting and presenting the information, comprising:

Plaintiff contends Trustpilot, Inc's web site has an interactive product review section that **extracts and presents information,** for example the word "**quality**" that Trustpilot, Inc's **computer discovers within a text content**, for example, **the review section, that will have the word "quality"** displayed for the user to see.

[Great shop and quality.]

I love everything I get from this store. Pass along the info when folks ask where to get blanks, too. Would be even better if you could add Tall sizes (at least for men). Don't like having to go elsewhere for those. Great shop.
